

School Spotlight Series, Summer 2024

Usa River Rehabilitation Center is located in the Central District. It includes a secondary school, a vocational training center and a Special Education Training Unit (SETU). The schools benefit from the large and appealing property. The classrooms are clean and bright, with grounds that are very well maintained. The Center generates income through a Guest House, Café, Bakery and a Gift Shop.

URRC Secondary School was established in 2018 with Forms 1-4. Led by Mr. Emanuel Ayo there are 85 boarding students, some with physical disabilities. This group has been very successful in National Exams with all form 2 and form 4 students passing in 2023.

The Secondary School's greatest needs include:

- Student scholarships
- Infrastructure, specifically a Physic lab (as required by Tanzanian government) and a library
- Teaching and learning materials including textbooks, lab equipment, chemicals for science experiments and computers

Usa River Rehabilitation Center Special Education Training Unit has 40 students led by Jenifer Lucas. This school's focus is to prepare students with cognitive disabilities for independent living while developing marketable skills including creative arts. They also train adults who want to work with students with disabilities. This program's greatest needs are scholarships to increase enrollment and funds to remodel the dining hall and dormitories.

Usa River Rehabilitation Center – Vocational Training Center is led by Pastor Elisha Masangwa. The Center serves students with physical and cognitive disabilities. They receive training in baking, sewing (including hand operated sewing machines vs foot pedals), working in the school's bakery/café and welding.
